

EV CHARGING READINESS

Access, coverage & service-readiness / U.S. inventory snapshot · 20 Sep 2026

State / jurisdiction

All

Access

All

Total stations

Distinct sites · not ports

89.4K

Public access

Share of selected stations

93.8%

Marked available

Snapshot status · not uptime

97.7%

DC-fast capable

At least one reported fast port

18.2%

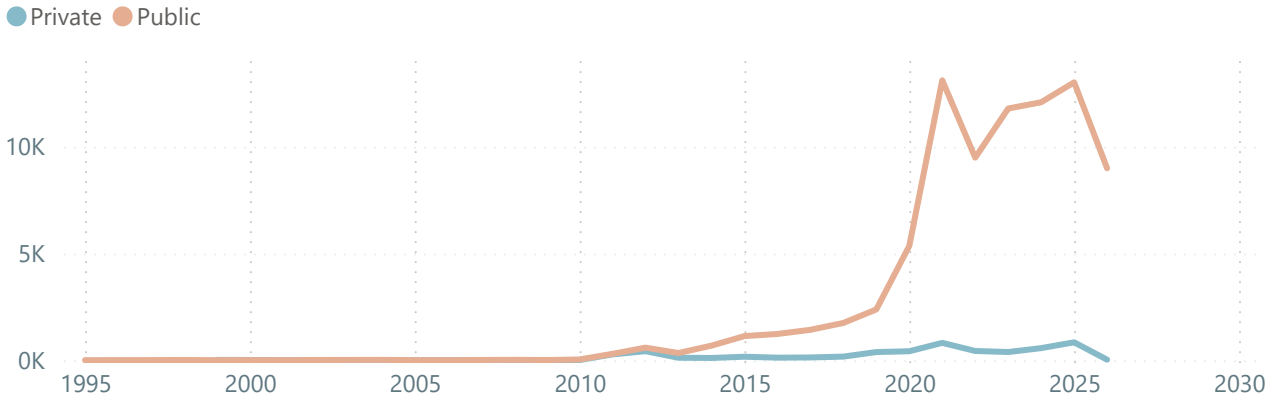

Readiness score

Explainable heuristic / 100

65.1

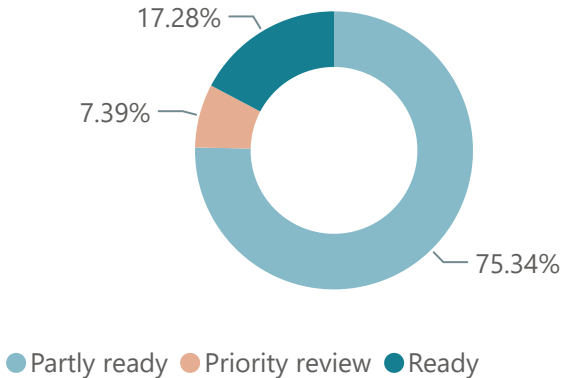

Stations by reported opening year

Current inventory cohorts · 2026 is partial · unknown years excluded

Station readiness mix

Ready ≥80 · partly ready 50–79 · review <50

01 / READ THE SIGNAL

Coverage ≠ reliability

Available is a status in one inventory snapshot. Validate outage and charging session history before claiming uptime.

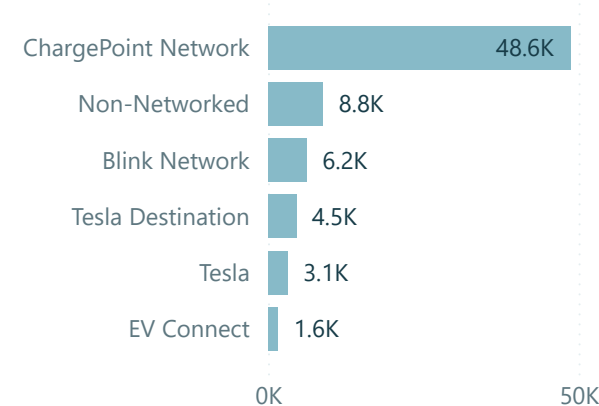

Coverage by jurisdiction

Population-normalized access · sorted by density

Jurisdiction	Stations	Public + available / 100k	Available	DC fast
Vermont	580	84.2	97.4%	19.1%
Massachusetts	4,862	63.7	98.7%	11.2%
California	21,536	50.7	98.0%	13.5%
Colorado	3,134	47.9	98.1%	16.5%
Maine	688	45.9	98.5%	20.1%
District of Columbia	395	44.1	97.7%	2.8%

Largest network footprints
